PROFILE

Machine Learning Engineer / Software Engineer with 4+ years of experience building and shipping production ML and AI systems, with a focus on NLP, LLMs, and conversational AI. At Doctolib, I contributed to an LLM-based phone assistant in a real-world healthcare setting (appointment booking and prescription requests), building Python agents, improving reliability/observability, and implementing GDPR-safe analytics through anonymous product events. Strong background in Python, deep learning, and scalable ML systems across industry and applied research.

WORK EXPERIENCE

Present
Aug 2024

Software Engineer, DOCTOLIB, Berlin, Germany

- Developed an LLM-based conversational assistant to help patients with services such as booking appointments and ordering prescriptions.
- Built intelligent agents using Pydantic AI to automate workflows.
- Designed architecture to capture product events for analytics and data-driven insights.
- Created and monitored SLOs and SLAs to ensure application reliability and performance.

Jul 2024
Dec 2023

Python Developer, AARON GMBH, Berlin, Germany

- Engineered and optimized the **phone-assistant-flow-engine**, the central state machine responsible for real-time conversational logic and call routing.
- Wrote the technical design for Patient Identification and contributed to its implementation (modular, AI-backend-agnostic design; patient details extraction; matching API integration; retries/backoff; tracking events).
- Implemented a yes/no/unknown classifier endpoint used for confirmation steps inside the assistant's conversation flow.
- Built and ran PromptFoo evaluation suites to validate classifier behavior and reduce regressions.
- Developed production features and wrote/maintained automated tests (unit/integration) to support safe refactors and feature rollout.

Jun 2022

Machine Learning Engineer, AARON GMBH, Berlin, Germany

- Designed and implemented pipelines for cleaning and anonymizing healthcare text data for training and analysis.
- Trained machine learning models for text and audio (TensorFlow/PyTorch/Whisper) to automate healthcare communication tasks.
- Built software solutions to improve dialogue flow quality and reduce failure cases in user interactions.
- Scaled data processing and training workflows using AWS (SageMaker, Athena, Glue).
- Onboarded and mentored an intern, supporting ramp-up on the codebase, data workflows, and delivery practices.

September 2021
October 2020

Research Assistant, FRAUNHOFER IAIS, Sankt Augustin, Germany

- Contributed to the development of lesion detection methods for complex 3D CT scans.
- Conducted training sessions and experiments with three object detection models—RetinaNet, YOLOv3, and YOLOv5—across various resolutions, analyzing their impact on model accuracy and speed.

January 2022 April 2017	Masters of Science in Autonomous Systems, HOCHSCHULE BONN-RHEIN-SIEG, Sankt Augustin, Germany > In this course, I had the opportunity to study subjects like Artificial Intelligence, Neural networks, Learning and Adaptivity, Computer vision, Natural Language Processing. > Worked on Natural Language Inference project and did a master thesis on "Object Detection in Dense Volume Data"
June 2014 August 2010	Bachelor of Engineering in Electrical and Electronics, RAMAIAH INSTITUTE OF TECHNOLOGY, Bengaluru, India > Relevant Coursework : Fundamentals of Computing, Artificial Neural Networks, Nanotechnology, Logic desing, Microcontrollers - Programming and Interfacing > Thesis in Estimation of Line Parameters of standard IEEE 14 Bus system

Technical Skills

- > **Languages** : Python (Expert), Matlab, Java, C++, HTML, CSS
- > **Generative AI & Engineering** : **Pydantic AI, LangChain, Promptfoo**, ChatGPT (Prompt Engineering), Flask, MLflow
- > **AI & Machine Learning** : TensorFlow, Keras, PyTorch, Scikit-learn, Flair, Gensim
- > **Data Science & Specialized Libraries** : Pandas, Numpy, Scipy, Librosa (Audio), OpenCV (Vision), Pydicom (Medical), NLTK, Spacy, Matplotlib, OS, PIL
- > **Cloud & Infrastructure** : AWS (Sagemaker, Athena, CloudWatch), Docker, Heroku, GPU Clusters
- > **Databases & Development Tools** : MySQL, Git, Jira, Jupyter Notebook, PyCharm
- > **Operating Systems** : Linux Ubuntu, macOS, Windows

PUBLICATIONS

- > Dutta K. K., Poornima S., **Sharma R.**, Nair D., & Ploeger P. G.
Applications of Recurrent Neural Networks : Overview and Case Studies.
In *Recurrent Neural Networks*, CRC Press, June 2022, pp. 23–41.
