15-June-1991 Nepal

WORK EXPERIENCE

June 2024
Present

Software Engineer, DOCTOLIB, Berlin, Germany

- Developed an LLM-based conversational assistant to help patients with services such as booking appointments and ordering prescriptions.
- Built intelligent agents using Pydantic AI to automate workflows.
- Designed architecture to capture product events for analytics and data-driven insights.
- Created and monitored SLOs and SLAs to ensure application reliability and performance.

Python LLMs NLP Pydantic AI PostgreSQL Elasticsearch Datadog Sentry Metabase Amplitude Kubernetes

June 2022
June 2024

Machine Learning Engineer, AARON GMBH, Berlin, Germany

- Designed and implemented data pipelines for robust cleaning and anonymization of textual data.
- Build machine learning models for text as well as audio data.
- Created software solutions to enhance and optimize dialogue flow, improving user interactions.

Python Tensorflow Keras Pytorch Pandas Librosa Numpy Scikit-learn Flair Whisper regular expressions
AWS sagemaker AWS Athena AWS glue jira bitbucket ChatGPT

September 2021
October 2020

Research Assistant, FRAUNHOFER IAIS, Sankt Augustin, Germany

- Contributed to the development of lesion detection methods for complex 3D CT scans
- Conducted training sessions and experiments with three object detection models—RetinaNet, YOLOv3, and YOLOv5—across various resolutions, analyzing their impact on model accuracy and speed.

Python Tensorflow Keras Pytorch Pandas Numpy Scikit-learn git GPU cluster

April 2020
November 2019

Digitization for industrial engineering intern, AUDI AG, Ingolstadt, Germany

- Creation of concept and a structure for software within the Industrial Engineering
- Modeling components as a part of the digitization process
- Implementation of software that improves the comparison of different production scenarios
- Validation of results and optimization of the tools

Python Pandas Numpy Tkinter git docker

June 2019
April 2019

Applied Machine Learning Intern, INSORO GMBH, Cologne, Germany

- Utilization of Deep learning models(LSTM & GRU) in capital markets time-series prediction
- Creation of automatized test cases for portfolio optimization

Python Tensorflow Keras Pytorch Pandas Numpy Scikit-learn

EDUCATION

January 2022
April 2017

Masters of Science in Autonomous Systems, HOCHSCHULE BONN-RHEIN-SIEG, Sankt Augustin, Germany

- In this course, I had the opportunity to study subjects like Artificial Intelligence, Neural networks, Learning and Adaptivity, Computer vision, Natural Language Processing.
- Worked on Natural Language Inference project and did a master thesis on "Object Detection in Dense Volume Data"

June 2014
August 2010

Bachelor of Engineering in Electrical and Electronics, RAMAIAH INSTITUTE OF TECHNOLOGY, Bengaluru, India

- Thesis in Estimation of Line Parameters of standard IEEE 14 Bus system

COMPETENCIES

COMPETENCIES

Programming Languages	Python, Matlab, Java, C++, HTML, CSS
Libraries & Frameworks	NumPy, Pandas, Pydantic AI, SciPy, TensorFlow, Keras, PyTorch, Scikit-learn, Matplotlib, OpenCV, Librosa, Whisper, Flair, NLTK, SpaCy, Gensim, Flask, MLflow, Tkinter, Pydicom, PIL
Databases & Data Tools	MySQL, PostgreSQL, MongoDB, Metabase, Amplitude
Cloud & DevOps	AWS SageMaker, AWS Athena, AWS CloudWatch, Docker, GPU Cluster, Heroku, Git, Jira, Bitbucket, ChatGPT
IDEs & Editors	PyCharm, VS Code, Eclipse, Sublime Text, Atom, Codeblocks, Spyder
Operating Systems	Linux Ubuntu, Windows, macOS

PERSONAL WEBSITE

I made a personal website using flask,HTML,CSS,JavaScript. I used Heroku Cloud Application Platform to deploy the website.
